Chinese Formula Inventory & Price Sheet 2019

Five Flavors Herbs offers an extensive list of canonical Chinese formulas for contemporary practitioners desiring an effective, convenient herbal delivery system that enhances patient compliance. We use the highest quality unsulfured Chinese herbs, which are tested for pesticide residues and sourced organically whenever possible. Our formulas are hand-crafted with integrity in our GMP compliant facility to ensure identity and purity. With nearly 400 tinctures in stock, we can assemble many more classic formulas than those listed here. Reach out if you do not see what you need!

TINCTURE

Unless otherwise indicated, the formulas are available as tinctures. Tinctures have an herb to menstruum ratio of 1:5 (200mg herb weight equivalence per ml). We macerate each herb separately, for optimum extraction according to the constituent solubility of each plant. The resulting extracts are then combined according to traditional recipe. Tincture is a great choice for acute symptoms as well as Qi regulating formulas.

LIQUID CONCENTRATE

We have some formulas available as Liquid Concentrate (indicated as LC). These are mixed, decocted (cooked), and then macerated all together, to offer a more traditional approach. The herb to menstruum ratio is 1:3 (333mg herb weight equivalence per ml), increasing the strength compared to standard tincture. We've found this method is superior especially for supplementing and tonifying formulas.
