

## Traditional Chinese Formulas

Five Flavors Herbs offers an extensive list of canonical Chinese formulas for contemporary practitioners desiring an effective, convenient herbal delivery system that enhances patient compliance. We use the highest quality unsulfured Chinese herbs, which are tested for pesticide residues and sourced organically whenever possible. Our formulas are hand-crafted with integrity in our GMP compliant facility to ensure identity and purity.

### LIQUID CONCENTRATE

We offer many pre-mixed formulas available as Liquid Concentrates (LCs). These are mixed, decocted (cooked), and then macerated all together, to offer a more traditional approach that incorporates more of the water-soluble compounds into the formulas. The herb to menstruum ratio is 1:3 (333mg herb weight equivalence per ml), increasing the strength compared to standard tincture. We've found this method is superior to Western-style tinctures especially for supplementing and tonifying formulas. These formulas can be modified using our Dui Yao Liquid Concentrates (2-herb combinations) to create many more traditional formulas to meet an individual's health needs. For more liquid concentrate offerings, please see our Conceivable Proline of modified Chinese formulas to support reproductive health.

### OTHER CHINESE HERBAL OFFERINGS

Our Online Custom Pharmacy can custom blend individualized tincture, granule, and/or raw herb formulas for herbal practitioners to dispense to their patients. Through our pharmacy, practitioners can modify stock Liquid Concentrates with single herb tinctures or Dui Yaos. We carry over 400 single herb tinctures including over 100 Chinese herbs that allow for flexible formulation and dispensing of hundreds of traditional Chinese formulas. Clinics and brands who wish to release their own formulas can also use our Contract Manufacturing services to produce larger volumes of bulk or pre-bottled/labeled white label or customized Chinese formulations.

# 2022 Chinese Herb Pricelist
